

DOOR HANDING U.S. STANDARDIZATION PROCEDURE

The HAND of a door is determined from the OUTSIDE of the door. The outside of a cupboard, bookcase, etc., is the room side. The outside of an entrance door is the weather side. When standing outside of a door if the hinges are on your right, it is a RIGHT HAND DOOR; if the hinges are on the left, it is a LEFT HAND DOOR. While standing outside, if the door is pushed open it is a REGULAR BEVEL; if the door is pulled open it is a REVERSE BEVEL door.
